

Optional Art Deco Step Cap for use with Alinea ES

Alinea ES Antique Brass

DELTA White Powder Coat

**Alinea ES and Delta,  
State of the Art Fluorescent  
Luminaires from AAMSCO**

The light is distortion free. The color rendering quality is excellent, as high as 98 C.R.I. The luminaires are sleek and streamlined, yet they discretely contain the industry's most compact electronic ballasts. Both are energy efficient without sacrificing design. AAMSCO has taken fluorescent lighting one step further.

The timeless classic design of the Alinea ES enhances the beauty of the linear lamp. The profile of the Delta makes a bolder design statement while maintaining a clean, crisp appearance.

**Energy Efficient**

The Alinea ES and Delta use an integral electronic ballast to operate energy efficient T-8 lamps. The high power factor ballast conforms with all E.P.A. regulations. The lamps start instantly without the flickering associated with other luminaires.

In addition to standard T-8 lamps, Alinea ES and Delta will operate special high color rendering lamps. These superior color rendering lamps produce tri-chromatic light in colors that correspond closely to the responses of the human eye for a more true to life appearance.

**Available Kelvin Temperatures\***

Color Temperatures	Color Rendering Index	Efficacy (lumens/watt)
• 2700	85	90
• 3000	85	90
• 3000	95*	65
• 3500	85	90
• 3800	95*	65
• 4100	85	90
• 5000	98*	65
• 6500	85	90
• 6500	98*	65

\*Superior color rendering lamps

**Quality Finishes**

White and black are painted after fabrication with a polyester resin powder. This ensures a thicker coat and smooth edges preventing injury or corrosion.

Before plating nickel, brass, or chrome, each component is hand polished with meticulous detail. Only the finest materials are used to produce these luminaires.

**Available Finishes**

- White Powder Coat
- Black Powder Coat
- Polished Chrome
- Satin Chrome
- Polished Brass
- Satin Brass
- Antique Brass
- Polished Nickel
- Satin Nickel
