

Ska

Ska is an up and down wall light which uses two G23 11watt lightbulbs to give a soft, wall-washing light.

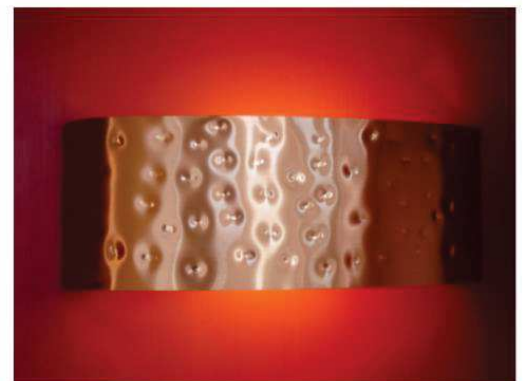

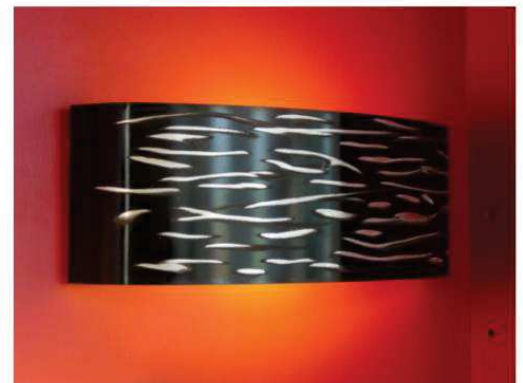

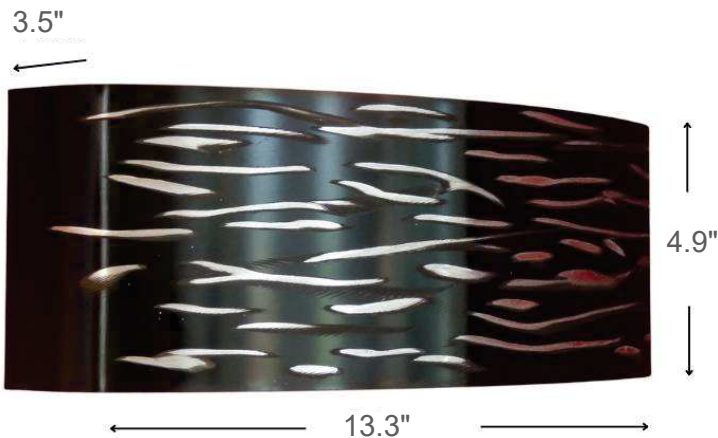

Presented in hammered copper, a signature of our workshop style, this light offers a warm look for any interior. We also make Ska with a ground black and silver shade which wears the careful marks of the metal workshop as decoration.

This light has been featured as a central component of a showcase of new Irish Design in the Dublin Chamber of Commerce and brings an authentic touch of craftsmanship to any home. We use two lightbulbs and twin ballasts, set in a formed and frosted acrylic mount which diffuses and softens the light.
